

Payment Method Integration

Merchant Order View API Documentation

V1.0

API Endpoint

POST	https://prodapi.paykoko.com/api/merchants/orderView
------	---

Description

This API allows merchants to view payment status by providing the Merchant ID, Plugin Name, and Order ID. The request must be signed with the merchant's private key for security.

The payment status is retrieved using the **orderId** specified in the **OrderCreate** request. To ensure reliable tracking and retrieval of order details, the **orderId** from the eCommerce platform must be handled uniquely across the system. Each new KOKO payment request should come with a new, unique **orderId** to prevent conflicts and ensure that each transaction is properly tracked and managed.

Request Structure

- Content-Type: **application/x-www-form-urlencoded**

Signature Creation

1. Data String:

- Concatenate: **MerchantID + PluginName + PluginVersion + OrderID + APIKey**
- Example Data String:
c8cca514bdfa0582cdc40c9703c71e9dcustomapi112383fA5n1xUaj80KnX23YY5vlni5q39gBi

2. Signing Process:

- Use the provided **private key** and **SHA-256 algorithm** to sign the data string, as done in order creation.
